

CARDIOVASCULAR SYSTEM

Very pale or blueish skin, dizziness or feeling weak, child offering weak response, passing out.

UPPER RESPIRATORY TRACT

Hoarse voice or difficulty making noise, trouble swallowing.

GASTROINTESTINAL SYSTEM

Repeated vomiting or persistent diarrhea.

2 SYSTEMS AFFECTED:

giving additional medication such as inhalers (bronchodilator) if the child has asthma or antihistamines.

4. Lay the child on the floor and raise their legs. If they have trouble breathing, sit them up. If they are vomiting, lay them on their side.
5. If symptoms don't improve or return, more doses of epinephrine can be given with 5 minutes or more between doses until the child is better or the emergency services arrive.
6. Inform parents.
7. Have the child transported to the ER even if symptoms resolve because symptoms may return.

B

In the presence of symptoms in **ONE** of the following categories:

EYES / NOSE / MOUTH

Sneezing, runny nose, blocked nose, red eyes, itchy or leaky eyes, itchy throat or mouth.

1. Administer a dose of antihistamines if it has been prescribed by the doctor.
2. Stay with the child; inform parents if they are not present.
